EUROIMPIANTI

coating lines

OUR HISTORY

We are an **Italian company** with **more than 45 years of experience** in the design and construction of **systems for coating** any metal surface.

After serving the needs of the Italian market, in the 1980s we began exporting our first coating systems to Europe, thus establishing our **ever-growing presence in the international market** as well.

At the same time, we enhanced our **close-knit Company management** with **highly skilled technical and sales professionals**.

Our group currently consists of over **80 employees** and **thousands of systems installed worldwide**.

We rely upon **production plants, sales offices** and **exclusive distributors** located in strategic commercial areas to offer an **attentive and complete service** to customers in **every country**.

For us, **our Company is like a family**, where **respect for people, environmental awareness,** and bold foresightedness are **fundamental principles**.

HOW WE WORK

We take care of each and every discrete project phase: **sales, consultancy, executive development, production, installation and testing**.

A **dedicated staff** approaches each project according to **our construction philosophy** of **modularity and flexibility**.

We applied the **serial production** logic to the individual components of our equipment, in order to build **functional systems** that are

optimally customized to every **customer's discrete needs**.

Our work does not end with the delivery of the system. We **establish a lasting and continuous relationship** with customers, providing them with the best **after-sales assistance**:

- **maintenance**
- **technical advice**
- **supply of spare parts**
- **staff training**

TRAINED LOCAL STAFF

EUROCOMPACT

The compact solution consisting of a powder coating booth and a polymerization oven.

EURO90

The automatic and flexible solution that can be customized according to production needs and piece size.

KOMBY

The manual and flexible system, ideal for coating small batches of any size and shape.

EUROCAR

The step coating system, optimized for handling of heavy and bulky items.

EUROVERTICAL

The vertical system for coating extruded profiles, ideal for obtaining maximum quality and productivity.

EUROHORIZONTAL

The coating system equipped with a Power & Free conveyor to make the best use of the available space.

PROCESSING CYCLE

COATING APPLICATION

After being loaded with the pieces to be processed, the load bar is painted in the powder coating booth installed on a translatable platform. The electrostatic guns will apply the powder paint, thoroughly covering all the products. If the pieces to be processed have undercut shapes, an operator will be required to touch them up.

POLYMERIZATION IN OVEN

To solidify and adhere to surfaces, the powder coating must be polymerized in the oven at a set temperature, for an appropriate period of time. For optimal results, the temperature inside the oven must be uniform and air circulation constant.

UNLOADING

Once the cycle is complete, the load bars will be set aside for the time necessary to cool down, after which the coated pieces will then be ready for handling and unloading.
